### 2. Background

- 2.1 As part of the review of the Professionalising Investigation Programme (PIP) the College updated the Senior Investigating Officer Development Programme (SIODP) in 2017 to ensure it meets the future needs of policing.
- 2.2 The revised programme consists of two routes to accreditation as an SIO, either Major Crime, or Serious & Organised Crime.

- 2.3 Learners will undertake a Core Learning module followed by a specialist module including a hydra exercise.
- 2.4 The programme will equip Learners with the knowledge, understanding, skills, attitudes and behaviours required when performing the role of a senior investigating officer.
- 2.5 Successful completion of the SIODP will enable investigators to attain accreditation as a PIP 3 Senior Investigating Officer in either Major Crime or Serious & Organised Crime. Those officers who require accreditation in both specialisms will initially obtain accreditation through one route, then re-enter the programme at the relevant specialist module. It will not be necessary to undertake a second Core Learning module unless Continuous Professional Development has lapsed over 3 years or more.
- 2.6 **Core Learning – IVSTX010:** the purpose of this module is to further develop the knowledge and skills gained at Professionalising Investigation Programme (PIP) level 2. On successful completion Learners will be able to undertake the role of a Senior Investigating Officer (SIO) for either Major Crime or Serious & Organised Crime investigations. It provides the core learning essential to the role of the SIO and includes the identification and development of appropriate investigative strategies, working with partner agencies, safeguarding, developing the investigative team relationships, the importance of disclosure and completing case reviews.
- 2.7 **Major Crime Investigation module – IVSTX018:** this module is designed to build on the knowledge and skills developed in the Core Senior Investigating Officer (SIO) module to enable SIOs to be able to perform the role of senior investigator on major crime cases (including homicide and public protection). The module covers the strategic management of a major crime investigation, the forensic strategy, working with the pathologist, deployment of a Family Liaison Officers (FLO), where appropriate, corporate settings and the role of expert witnesses in an investigation.
- 2.8 **Serious & Organised Crime module - IVSTX021:** this module is designed to build on the knowledge and skills developed in the Core Learning Senior Investigating Officer module to enable Senior Investigating Officers (SIO) to be able to perform the role of senior investigator in serious organised crime and proactive cases. It covers the strategic, tactical and risk elements essential for serious and organised crime and elements including organised crime group mapping, firearms threat and risk, safeguarding and how internal and external specialists and organisations can assist. For those senior investigating officers engaged in counter terrorism investigations, the phrase 'serious and organised crime' can be exchanged for the phrase 'counter terrorism' throughout this module specification.
